The war on straws is growing as many people want to ban the use of plastic straws. Governments and fast-food restaurants are working to reduce plastic **waste**. McDonald's has stopped giving plastic straws. Starbucks will stop using straws by 2020. Eco-friendly alternatives are available, but many of them have other problems.

Plastic straws are bad for the earth because they cannot be recycled. There are around eight million tons of plastic trash that end up in our oceans every year. Sea turtles are being found with straws stuck up their noses.

Two of the most common straw alternatives are paper and metal. Paper straws are still a single-use waste item and are not much better for the environment than plastic ones. However, she couldn't enter it and ended up getting caught by the police. She set herself on fire to protest the law. The news shocked the world. It made FIFA take action and focus on the problem.
